PERSONAL PROJECTS

Placements Web Application (07/2020 - Present)
- I used Python-Django, HTML/CSS, Javascript, Bootstrap.
- It is a website I designed in order to help my college as well as my fellow students.
- Students can learn the basic aptitude topics from my website which will be helpful for placements.
- College can communicate with students regarding the companies visiting the college, keeping the students updated.

Smart Car Parking System using Image Processing Techniques (2021 - Present)
- I used Arduino,Python-opencv.
- This is a mini-project I did as a team.
- This project helps people at parking slots by displaying the number of slots left in that parking space.
- This helps in avoiding the unnecessary travelling of vehicles across the filled parking slots in a city.

Smart Home Automation to control Doors and Lights (2020 - 2021)
- I used Arduino, Servo motor, HC-05 Bluetooth module.
- This is a mini-project I did as a team.
- Basically, this project helps with the doors and lights automation as soon as a person approaches.
